## Work Experience

### Android Developer | Sber

**June 2023 — Present** · Moscow · Full-time · Financial Sector

**Stack:** Kotlin, Java, Jetpack Compose, Custom View, Coroutines, Flow, RxJava, Dagger 2, Koin, Retrofit 2, OkHttp, Room, MVI, MVVM, Clean Architecture, Gradle, CI/CD

### Key Achievements:

- Delivered feature and common modules in **SberBank Online** and **SberInvestments** (90+ million users): CSI Surveys, Charity, SberPremier, and Service Packages sections.
- Designed and shipped two CSI survey modules for SberInvestments in under **3 weeks**; regression test of **120+ test cases — 0 defects**; section MAU — **12 million**.
- Led a global redesign and refactoring of CSI survey components: **2 form types × 12 unique UI components each**; updated module architecture, rewrote TalkBack logic, optimized Compose rendering.
- Developed Kotlin and Android courses for Sber's corporate university (**500+ students**); delivered lectures on an elective Android course at HSE University.
- Published **8 technical articles** on Habr (**5,000+ views** each); conducted **15+ internal meetups** on System Design, Best Practices, and Android architecture.

#### Responsibilities:

- Development of feature and common modules end-to-end: from architecture design to production release.
- Module and feature architecture design; technical decision-making.
- Regular Code Review.
- Analysis of user feedback and post-release metrics; ongoing performance improvements.
- Collaboration with cross-functional teams of 12–25 people (designers, analysts, backend, iOS, business stakeholders).
- Mentoring, onboarding new engineers, conducting interviews at all levels.
- Writing and maintaining technical documentation.

---

## Lead Mobile Developer | BWT Barrier RUS

February 2023 — June 2023 · Moscow · Full-time

**Stack:** Kotlin, Jetpack Compose, Coroutines, Flow, Dagger 2, Retrofit 2, Clean Architecture, SOLID, UDF, Gradle, CI/CD

#### Key Achievements:

- Designed and built from scratch an MVP Android app for smart home management in **3 months**; successfully **published on Google Play** and handed off to the team with full documentation.
- Wrote complete technical documentation (feature/core modules, design system) and onboarding materials, reducing new developer ramp-up time to **2–3 weeks**.
- Established the overall system architecture: service contract between app and backend, CI/CD pipeline, monitoring.

#### Responsibilities:

- Led Android app development from scratch: architecture, implementation, release.

- Designed overall system architecture (backend contract, CI/CD, monitoring).
  - Wrote technical documentation and onboarding materials for new team members.
  - Collaborated with analysts, backend developers, designers, and QA engineers.
  - Participated in and facilitated Scrum ceremonies (backlog grooming, sprint planning, retrospectives).
- 

## Laboratory Manager «KB-4» | RTU MIREA

**February 2022 — November 2022** · Moscow · Part-time

**Stack:** Kotlin, Android SDK, Python, C, C#, C++, Astra Linux

### Key Achievements:

- Developed an Android app in Kotlin enabling faculty to respond quickly to student requests.
- Optimized department IT support processes, reducing average response time by **25%**.
- Migrated all department equipment to Astra Linux.

### Responsibilities:

- Android application development for department needs.
  - Hardware and software support for department equipment and teaching staff.
  - Maintenance and improvement of student projects in Kotlin, C, C#, C++, Python.
  - Handling and resolving technical requests from students.
- 

## Education

**Master's Degree** · IT Project Management

RTU MIREA, Institute of Cybersecurity and Digital Technologies · 2026

**Bachelor's Degree** · Information Systems and Technologies

RTU MIREA, Institute of Cybersecurity and Digital Technologies · 2024

---

## Languages

**Russian:** Native · **English:** B2 (Upper-Intermediate)
